Oanda, Currency Converter,

July 13, 2014
The image contains a page from OANDA, a currency exchange service. The page features a currency converter tool, which allows users to convert between different currencies. The converter includes options for historical exchange rates, live exchange rates, and international money transfer.

The page also provides rate details and a recent trends graph for the Costa Rican Colon (CRC) to US Dollar (USD) exchange rate, with values for the 24-hour period ending Tuesday, May 27, 2008, 22:00 UTC. The rate details include minimum, average, and maximum values for the bid and ask rates, which are based on the average of the bid and ask rates OANDA receives from many data sources.

The currency converter tool is accompanied by a description of OANDA's currency calculator tools, which use OANDA Rates™, the touchstone foreign exchange rates compiled from leading market data contributors. The rates are trusted and used by major corporations, tax authorities, auditing firms, and individuals around the world.

The page also briefly mentions access to currency exchange rates back to January 1990, allowing users to enter currency names, 3-letter ISO currency symbols, or country names to select their currency. The tool can also be used to access a percentage from the interbank rate list to better approximate the tourist exchange rates actually charged by financial institutions.

Additional links are provided for mobile currency apps, exchange rate feed/API, and international money transfer services. The page also includes options to open an account, try a free demo, sign in, or enter a keyword.

The currency converter tool features a simple interface for users to input the amounts of currency they have and want to exchange, with options for using currencies marked with an asterisk (*). The page also offers links to historical exchange rates, traveler’s cheatsheet, and live exchange rates for different time periods such as 30 days, 60 days, and 90 days.

The top of the page includes currency converter tools such as currency converter, currency tools, and mobile currency converter, and the bottom of the page features links to other financial services like Forex Trading, Currency Converter, and Exchange Rates for Business.
