Ebola

Last Updated: June 03, 2015 06:46 GMT

More than 12 months after the largest ever Ebola outbreak began, the situation appears to be nearing an end. Liberia's outbreak was declared over on 9 May, and transmission continues to decline in Guinea and Sierra Leone.

International SOS has a team working around the clock to bring you this website - it provides the latest information on developments, travel advice and how individuals and organisations can respond. Downloadable resources are also available.

Latest news
24-hour coverage of recent events and outbreak updates.

Outbreak outlook
What may happen next
