Subject: Ciudad de las Artes

FYI

This morning, ANAM personnel came to the project for inspection.

- Billy Ubillus Bonini/Inspector of Natural Resources
- Bilibal Navarrete/Forest Engineer
- Marlene Vergara/Camsa

After requesting general documents and inspecting the area, they created a pre-form report that indicates the different requirements that have to be met.

In summary, the remarks are temporary, and we were required to keep the maintenance measures of erosion control and cleaning (Page 6). The note will be formalized and we will be able to withdraw it from the ANAM Metro offices from 15 December.

See attached the Field document.
