CRABTECH - Technology development for effective harvest of snow crab (Innovation project in the business sector – BIA).

Project title:

CRABTECH Technology development for effective harvest of snow crab (Innovation project in the business sector – BIA).

Duration:

2014-2017

Project objectives:

Primary objective: Develop a profitable and sustainable technology platform for harvesting snow crab based on Norwegian demands for EHS, salaries and product quality. Secondary objectives:

- Reduce labor force on deck from 5 to 3 persons per shift.
- Reduce labor force in factory from six to three persons per shift
- Eliminate all processes on board which cause unacceptable risk for crewmembers, both risk for direct injuries and injuries caused by long-term stress.

Participants involved:

OPILIO AS

FITJAR MEKANISKE VERKSTED AS

MUSTAD AUTOLINE AS

SINTEF NORD AS

UNIVERSITETET I TROMSØ

MARINE INST MEMORIAL UNI ST. JOHN'S, CANADA
