Subject: Solvita

Good morning.

We have submitted the report for Solvita.
Awaiting to hear from you if there is anything for Saldus and Solveiga that needs to be changed.

The following changes have been made:

- Changed for four to five voyages with speed <6 knots.
- Changed text on voyage 5
- Changed text on voyage 6
- Summary voyage 6. We have changed the table. Number of hours on Russian Shelf was wrong (98,5) Changed to correct 242,50.
- Changed text on voyage 21
- Changed text on voyage 26.
- Ex voyage 26. We are asked to change the percent from 0,59 to 0. Based on the order, we were asked to calculate the theoretical quantity that could have been harvested on the Norwegian and Russian continental shelves. We have therefore wanted to deliver results that was according to the order.
- Figure 149 changed text to mechanical, electrical or other difficulties with the AIS transponder, (the equipment who sends AIS signals)
- Figure 151. Text from Mubarak are ok
- Figure 153 changed the table. It was marked red cause that the time on Russian Shelf must have been more than 261,56 hours. (AIS-signals stopped n Russian shelf).
- Time for last AIS- position filled in under figure 160.

Have a great day.

Best regards,

Bjørnar Myrseth

God morgen.

Da har vi lagt inn rapporten for Solvita.
Avventer å høre fra dere om det er noe for Saldus og Solveiga som må endres.

Følgende endringer er gjort:

- Changed for four to five voyages with speed <6 knots.
- Changed text on voyage 5
- Changed text on voyage 6
- Summary voyage 6. We have changed the table. Number of hours on Russian Shelf was wrong (98,5) Changed to correct 242,50.
- Changed text on voyage 21
- Changed text on voyage 26.
- Ex voyage 26. We are asked to change the percent form 0,59 to 0. Based on the order, we were asked to calculate the theoretical quantity that could have been harvested on the Norwegian and Russian continental shelves. We have therefore wanted to deliver results that was according to the order.
- Figure 149 changed text to mechanical, electrical or other difficulties with the AIS transponder. (the equipment who sends AIS signals)
- Figure 151. Text from Mubarak are ok
- Figure 153 changed the table. It was marked red cause that the time on Russian Shelf must have been more than 261,56 hours. (AIS-signals stopped n Russian shelf).
- Time for last AIS- position filled in under figure 160.

Ha en flott dag.

mvh
