I am already in the sml ...: (Seattle - Ams - Helsinki, I spend the night there and further north ... The road is far, sometimes you fly longer than you are there.

According to Kw Ivangorod 852, Solaris 882. This may be critical if for example someone has 860. Then there is a pattern, Ivangorod is a trawler of Soviet construction, type srtm-k, there were hundreds of them built to all fleets, including the Baltic. And this figure can be transmitted somewhere, if such a steamer is somewhere sawed.

In general, tomorrow afternoon, I'm in Helsinki, write-call.

K.

Hello !

Ok, thanks ! Received and already sent. I hope for a prompt response. As far as I could figure out, both ships are 882 kW each, yes? Well, it is - for common development. Tomorrow, try to call them.

Tell me how you will know exactly your plans.

Peter

PS Listen, when do you fly out of USA? I thought there was an opportunity to order something from Apple, but this is not in a hurry and I can later through [REDACTED] colleagues.

Я уже в смл... :(сиэтл - амс - хельсинки, там ночью и дальше на север... Дорога дальняя, иногда летаешь дольше, чем там находишься.

По квт у Ивангорода 852, у Соляриса 882. Это может оказаться критично, если вдруг к примеру у кого-то есть 860. Потом еще есть закономерность, Ивангород это траулер советской постройки, тип сртм-к, их было сотни построено всем флотам, в том числе и на Балтике. И может где-то передаваться именно эта цифра, если такой пароход где-то распилили.

В общем, завтра днем я в хельсинки, пиши-звони.

Privet!

OK, thanx! Poluchil i uzhe pereslal. Nadejusj na operativnuju reakciju. Na koliko ja smog razobrattsja, to oba sudna po 882 kW, da? Nu eto tak - dlja obshego razvitija. Zavtra popitajusj s nimi sozvonitsja.

Soobshi, kak budesh tochno znatj svoi plani.

Peter

PS Slushaj, a kogda ti viletajesh iz USA? Ja tam dumal s okazijej chto to iz Apple zakazatj, no eto ne k spehu i mogu potom cherez [REDACTED] kolleg.
