Shlu photo lots. All photos - Aug-Sep 2013, during the last ascent to the dock. They raised the dock themselves for themselves, cleaning the bottom after parking, not at the request of the register - so this time they didn't do a full painting of the bottom. This is if asked.

I'm a little confused, what kind of ship did I send you, and what not?

1. The right to fly the flag of the Russian Federation
2. Property rights
3. ITC (international tonnage certificate)
4. Minimum safe manning
5. Radio licence
6. Classification certificate
7. Registrar ship monitoring (CC)
8. General Arrangement drawing

What is missing from this?

Hello!

Uff ... well, what - the contract is signed, the money paid. Once again, it was on all points of the agreement and said what was going on if suddenly one or the other side was not ready / could not continue the deal. Everything is clear, everyone is ready to work and come to the desired result as soon as possible. [REDACTED] will try even earlier.

So - we can say that the ball is running! :) Hopefully we will succeed!

I threw the photo into a separate folder and sent the Google Drive to the inspector - let him look. Today he was somewhere away, will look tomorrow. I will clarify what else he needs for the papers.

It seems so far.

If the inspector needs something else, let him say something specifically, they will photograph him and send him.

For papers, let them also give you a list of what you need, we'll send everything.
