HOD 15/71	15/3490-28	02.10.15

Postal Vote HOD 15/71

Reference is made to the HOD letter dated 17 September 2015 (HOD 15/71), concerning the EU notification to undertake exploratory fishing in the NEAFC Regulatory Area of the Barents Sea. It is noted that that the target species is *Chionoectes opilio* (snow crab).

Norway votes against the proposal. Norway underlines that the NEFAC Commission cannot at this stage give its approval to the proposed exploratory fishery, as an express consent from the relevant coastal state is needed.

The above-mentioned crab species is regarded as sedentary species according to article 77, paragraph 4 of the United Nations Convention on the Law of the Sea (the LOS Convention). Coastal States thus exercises sovereign rights for the purpose of exploring and exploiting this resource.

Sedentary species are defined in article 77, paragraph 4 as “organisms which at the harvestable state, either are immobile on or under the seabed or are unable to move except in constant physical contact with the seabed or the subsoil”. Snow crab is thus to be considered as a sedentary species. In so far as the species occurs on the continental shelf as defined in Article 76 of the LOS Convention the resource is subject to coastal state jurisdiction in accordance with Article 77. According to Article 77 (2) no one may undertake exploration or exploitation of such resource without the express consent of the coastal state.

The seabed and subsoil of the exploratory fishing area in question is under coastal state jurisdiction. Consequently, the proposed exploratory fishery for snow crab needs the express consent of the coastal state.

The secretariat is kindly requested to circulate this letter to all contracting parties.

Yours sincerely,

Ann Kristin Westberg
Deputy Director General

Ingrid Vikanes
Senior Adviser
