Sender: Sub-Directorate of Production  
Northern Region  
Gulf Tertiary Oil Production Asset

Number: PEP-SPRN-APATG-2015

Addressee: David Gonzalez Munoz  
Project Services Management

Background:  
Numbers:  
Unique file number:  
Date(s):

Subject: Status of Drilling and Completion  
Activities of ENP wells.

○ Exhibit:

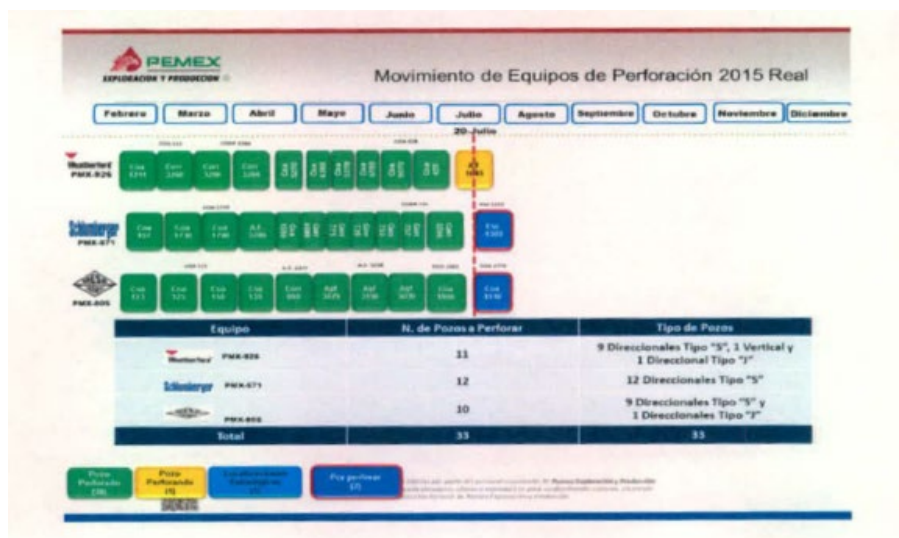

Derived from budget adjustments for 122 million pesos, payment of cost adjustments for 109 million pesos, which have impacted the budget of the Gulf Tertiary Oil Production Asset, as well as the failure to negotiate the agreements for slender wells and not obtain competitive costs from the companies that provide services.

The asset has decided to direct the remaining resource in SAP for the ENP, towards activities focused on maintaining the base production, conversion of wells to Electro Centrifugal Pumping, Hydraulic Pumping in order to maintain the production platform and thus minimizing the differences in production to the parameters established by the DG of Pemex.

The foregoing causes that currently there is no available budget to continue executing drilling activities and Completion of wells with the contracts of the National Drilling Strategy, for which you are requested to extend the communication and carry out the pertinent procedures before the service provider companies so that once the drilling or completion is completed, as indicated by the movement of attached equipment, proceed to dismantle and transport the equipment to their respective bases operation.

It is worth mentioning that the projection of closing activities in the contracts of the National Strategy will be 33 drilled wells and 36 finished:

Equipment movement:

The reactivation of activities of the ENP will be when the budget is available for the generation of service order (43XXXX).

Sincerely,

Héctor Agustin Mandujano Santiago  
Administrator
